

Introducing cordin8 Release 3.0

HOUSTON - cordin8 technologies is pleased to announce the latest version of cordin8. Working with great partners and customers, we have taken cordin8 to a new level. Some of the new capabilities and objects which are incorporated into cordin8 Release include:

- Powerful new measure tracking capability (target vs. actuals)
- New Portfolio Analyzer tool for 'what if' analysis
- Enhanced Portfolio (Active Programs / Projects) reporting
- Program Notebook for managing a collection of projects
- Configurable Idea Management process for capturing and tracking new ideas
- Ability for non-project team members to identify and track issues
- Enhanced project timesheet and approval process
- New resource management request and assignment workflow processing
- Enhanced Project Knowledge Base for capturing and searching: Lessons Learned, Project Artifacts, and Project Risks

cordin8 technologies is the developer of cordin8, a collaborative business platform designed to transform the management of knowledge work in the Web 2.0 era. cordin8 delivers pre-configured solutions and objects to create custom solutions. cordin8 solutions target portfolio program management office operations, strategic management, and balanced scorecard reporting. These solutions allow customers to put the power of Web 2.0 to use driving strategic change now.
